

Equipment Description

Equipment designed and developed for use with Test Finger (Articulated, Rigid, Nails) to check the accessibility to live parts of equipment under test.

The equipment give a voltage of 60Vca and indicates with a red light, if there is current flow between the two output terminals.

Technical characteristics

- Power Supply: 220Vca, 50 Hz, single-phase (115 Vac opcional).
- Applied Voltage: 60Vac.
- Dimensions: 260mm x 200mm x 140mm(h)
- Weight: 0,50 Kg
